Software Security Practitioner .NET

PCI Secure Software Lifecycle (2019)

2011–2014

UNAC

B.Tech in Systems Engineering

KEY SKILLS

- .NET / C# (Framework, Core, 6–10)
- Python / REST & SOAP APIs
- ASP.NET Core / EF Core
- React / Angular / TypeScript / Vite
- Azure / GCP / AWS
- SQL Server / PostgreSQL (pgvector) / MySQL
- MongoDB / BigQuery / Azure Table Storage
- Microservices / Event-Driven Architecture
- RabbitMQ / Azure Service Bus / Hangfire
- LangChain / LangGraph / RAG / Vertex AI / MCP
- Docker / Azure DevOps / Datadog
- SonarQube / Checkmarx / xUnit
- Claude Code / GitHub Copilot / Codex

LANGUAGES

English: Advanced

Spanish: Native

Public résumé. Personal address, phone number, identification data, references, and confidential client details intentionally omitted.

PROFILE SUMMARY

Senior Software Developer with 10+ years of experience building enterprise web applications, APIs, and microservices with .NET (C#), Python, React, and Angular. Experienced in cloud-ready solutions and distributed systems on Azure, as well as GCP and AWS. Proven background in financial and banking products, technical leadership, architecture, code reviews, and Agile delivery, plus hands-on experience building generative AI and RAG workflows.

WORK EXPERIENCE

Hireworks — PRESENT

Senior Full-Stack Developer

Client: Togetherhood Inc.

- **Stack:** .NET 10, React, Vite, MySQL, Docker, Hangfire, AWS, Datadog, Claude Code.
- Engineer .NET 10 services integrating Checkr, DocuSign, Sakari SMS, and Notion via webhooks and REST APIs, plus React/Vite apps on Docker and AWS.
- Lead architecture, database, and design-pattern decisions using Claude Code as a collaborator, reviewing AI-generated code for security and maintainability.
- Build reusable AI skills and specialized agents for pre-PR security reviews, database migrations, and other sprint activities.
- Run scheduled background jobs with MySQL and Hangfire, monitored with Datadog.

Globant — 2022–2026

Senior .NET & Full-Stack Developer

- **Stack:** .NET 8+, C#, Python, Angular, React, Azure, GCP, AWS, SQL and NoSQL databases.
- Developed .NET services and React microfrontends, and designed resilient Azure Service Bus architectures with dead-letter queues, retries, circuit breakers, and asynchronous messaging.
- Integrated SQL Server and Azure Table Storage, managed secrets with Key Vault, maintained Azure DevOps YAML pipelines, and diagnosed production issues through Azure Monitor and log analysis.
- Built an AI recommendation POC with .NET, Azure Functions, MongoDB, Azure Table Storage, and Azure Personalizer, contributing to architecture and technical co-leadership.
- Developed Python APIs integrating Gemini through Vertex AI, with LangChain, LangGraph, RAG over PostgreSQL (pgvector), and MCP servers.
- Built Cloud Run jobs with Cloud Scheduler to process embeddings for a SQL agent querying BigQuery, with secrets and monitoring managed on GCP.
- Built an AWS video-streaming POC that served Amazon S3 file chunks asynchronously.

Inaltec SAS 2013–2022

Tech Leader / Full-Stack Developer · Financial & Banking Products

- Led 3 developers and 3 testers delivering the company’s own secure financial and banking software products in an Agile/Scrum environment.
- Built core solutions initially deployed on-premises with .NET, Blazor WebAssembly, and SQL Server; parts of the product ecosystem later incorporated Azure services.
- Designed SOAP and REST APIs, middleware, and RabbitMQ-based microservices for third-party and legacy-system integrations.
- Modernized an Angular platform and maintained applications using JavaScript, jQuery, and Kendo UI.
- Conducted code reviews and mentoring, improving code quality and reducing production defects.
