EDUCATION

2024

COURSE · UDEMY

AZ-204 Developing Solutions for Microsoft Azure

2020

COURSES · SECURITY COMPASS

Software Security Practitioner .NET

PCI Secure Software Lifecycle (2019)

2011–2014

UNAC

B.Tech in Systems Engineering

KEY SKILLS

- .NET / C# (Framework, Core, 6–10)
- ASP.NET Core / EF Core
- Angular / React / TypeScript
- Azure / GCP / AWS
- SQL Server / PostgreSQL / MySQL
- MongoDB / Azure Table Storage
- REST & SOAP APIs
- Microservices / Event-Driven Architecture
- RabbitMQ / Azure Service Bus
- Python / LangChain / LangGraph
- GenAI / RAG / Vertex AI / MCP
- Docker / Azure DevOps / CI/CD
- Git / Claude Code

LANGUAGES

English: Advanced

Spanish: Native

Public résumé. Personal address, phone number, identification data, references, and confidential client details intentionally omitted.

PROFILE SUMMARY

Senior Software Developer with 10+ years of experience building cloud-native and microservices-based applications with .NET, React, and Angular across Azure, AWS, and GCP. Experienced in technical leadership, architecture, event-driven systems, enterprise integrations, secure software delivery, and practical generative AI solutions.

WORK EXPERIENCE

Hireworks — PRESENT

Senior Full-Stack Developer

Client: Togetherhood Inc.

- **Stack:** .NET 10, React, Vite, MySQL, Docker, Hangfire, AWS, Datadog, Claude Code.
- Develop .NET 10 and React applications, including API and webhook integrations with Checkr, DocuSign, Sakari SMS, and Notion.
- Lead architectural decisions, database changes, and design-pattern selection while using Claude Code as a development collaborator.
- Review AI-generated code for alignment with project architecture, security, quality, and maintainability standards.
- Build reusable AI skills and specialized agents for pre-PR security reviews, database migrations, and other sprint activities.

Globant — 2022–2026

Senior .NET Developer

- **Stack:** .NET 8+, C#, Python, Angular, React, GCP, Vertex AI, Gemini, Azure, AWS, SQL and NoSQL databases.
- Built .NET, Angular, React, and Python solutions across cloud client engagements.
- Developed Python APIs integrating Gemini through Vertex AI, with LangChain, LangGraph, RAG, vectorized data, and MCP servers.
- Designed resilient Azure Service Bus architectures using dead-letter queues, retries, circuit breakers, and asynchronous messaging.
- Built an AI recommendation POC with .NET, Azure Functions, MongoDB, and Azure Personalizer, contributing to architecture and technical leadership.
- Improved delivery and operations with automated tests, CI/CD pipelines, monitoring, security analysis, and secret management.

Inaltec SAS — 2013–2022

Tech Leader / Full-Stack Developer · Financial & Banking Solutions

- Led 3 developers and 3 testers delivering secure banking applications in an Agile/Scrum environment.
- Designed .NET and SQL Server systems, SOAP and REST APIs, middleware, and RabbitMQ-based microservices.
- Modernized an Angular platform and maintained applications using JavaScript, jQuery, Kendo UI, and Blazor WebAssembly.
- Conducted code reviews and mentoring, improving code quality and reducing production defects.
